HUMAN TREASURES OF TODAY

I shall describe one tribe of the world, the only tribe I ever visited personally—the Wauraus of the Amazon Delta.

Only a few white men have ever visited the Wauraus, and the tribe is still a mystery to the world.

Reports of United States wheat have been close to \$2.00, and the price of wheat is still high.

COMMISSION ON ATHLETICS NOW PROPOSED

BILL TO BE PRESENTED IN LOWER HOUSE OF LEGISLATURE TO BE OF FIVE MEMBERS

One Of Purposes Would Be To Regulate Boxing In Illinois

(By Associated Press)

Springfield, Jan. 21.—A state athletic commission to regulate boxing, under a license plan, is proposed in a bill introduced in the lower house of the legislature by Representative Walter Gallas of Chicago. Those who have read the measure appear favorably impressed with its provisions.

A commission of five members would be formed under the bill, each to be appointed by the governor and serve without pay. Two would be chosen for two years, two for four years and one for six years. Successors also would be appointed. A secretary to the commission would receive \$5,000 a year.

Sparring matches or boxing exhibitions would be permitted except by a license issued to a club or organization, which must be incorporated and have at least 100 members. Applications for licenses would have to be accompanied by an annual fee of \$25 in cities of not more than 10,000; \$50 in cities of not more than 25,000; \$100 in cities of not more than 50,000; \$150 in cities of not more than 75,000; \$200 in cities of not more than 100,000; \$250 for seating capacity of more than 200 and not exceeding 500; \$300 for seating capacity of more than 500 and not over 1,000; \$350 for capacity of more than 1,000; and not exceeding 1,500; \$400 where seating capacity exceeds 1,500.

Inspectors would be appointed by the commission to act whenever it is deemed necessary. One inspector would attend each bout to observe the regulations, count receipts and report to the state commission.

Participants in bouts, under the bill, would not be permitted to enter the ring unless a physician, appointed by the commission, passed upon the fitness of the fighter. The physician's fee would be paid by the licensee conducting the exhibition. Smoking, wagering and sale of intoxicants would not be permitted within the same building where the bout was arranged. Bouts would be limited to 15 rounds.

Decisions would be permitted in amateur tournaments under the authority of the Amateur Athletic Union of the United States, but no referee could give a decision.

Forfeiture of the club license and \$1,000 cash forfeit would be the penalty for violation of the provisions in the bill. Fines ranging from a \$1,000 minimum to \$5,000 maximum, and prison sentences ranging from one year to five, or both.

Licenses would not be issued by the state commission, the bill says, unless the city "shall have consented by ordinance or resolution by its city council to the conducting of boxing or sparring exhibitions within the city."

Appropriate, All Right.

"What's the name of this infant?" demanded the colored person who was officiating at the christening of Monday's latest offspring. "Her name is Opium Bryant," was the firm reply.

The parson protested. "Opium, not no name for a girl!" "Well, it's Opium," said Maundy, "for they say opium comes from wild poppy and the child's poppy suah am wild."—San Francisco Argonaut.

Tremendous Growth of Silk Manufacture in the United States

THE NATIONAL CITY BANK OF NEW YORK
(From the WEEKLY TRADE REPORTS Issued by The National City Bank)

The silk worm has apparently 800,000,000 worth of silk goods. This big increase in the output of our factories means that we are producing a considerable market for the manufacturers abroad for this important material. The four years after the close of the war, the value of silk manufactures exported from the United States in the calendar year 1920 was approximately \$2,000,000. The value of silk manufactures exported from the United States in the calendar year 1921 was approximately \$2,000,000. The value of silk manufactures exported from the United States in the calendar year 1922 was approximately \$2,000,000. The value of silk manufactures exported from the United States in the calendar year 1923 was approximately \$2,000,000.

Curiously, too, the quantity of silk being brought into the country—even at these spectacular prices of over \$7 per pound—is approximately twice as great as in by far the largest silk consuming year, 1911, when the price was less than half that of today. Silk exports would double the fact that all of the raw material which we use in manufacturing country of the silk entering the United States in this line is brought half way United States was reported by the full year 1922 exceeds by saying that we are to—against \$20,000,000 in 1914, and the 1922 total to 50,000,000 pounds of the world and using practically in wages in the silk industry in 1914, and 45, all of it in our own factories, for 1914 was \$10,000,000, against \$7,000,000 in 1913, and \$5,000,000 in 1912.

Women of Spain.

In Spain a woman can go nowhere unaccompanied by her servant. If she goes out to tea in full daylight, she must wait for the servant to fetch her home. If she goes to the town to visit a dentist, she must never move without her servant and never go near any kind of amusement.

Jefferson and Hamilton.

Thomas Jefferson as Washington's secretary of state, and Alexander Hamilton, as his secretary of the treasury, had opinions on subjects of national importance that were diametrically opposite. About one grew up with the Democratic party, and about the other the Federalist.
